

workplace health like nothing you've ever tasted

The list of economic benefits of a workplace health program targeting healthy diet includes: better morale, fewer sick days, higher job satisfaction and energy level, improved corporate image and staff retention, and lower healthcare costs. In fact, research estimates that around one-third of all cancers might be influenced by diet.

However, not every business can offer healthy dining on-site for employees, businesses lunches, holiday parties, and events. That's why we created the Fresh Healthy Workplace Program.

FRESH - Healthy Café offers a nutritious, delicious menu without parallel. Whether you need a complete meal or just a selection of refreshing beverages, FRESH has everything you need to satisfy and energize your employees and guests. Choose from our wide array of healthy wraps, grilled paninis, crisp salads, all-natural smoothies and fresh squeezed juices. Promoting healthy eating is a vital part of promoting workplace wellness.

FRESH - Healthy Café... part of your active lifestyle

FRESH - Healthy Café takes pride in offering a nutritious alternative to traditional fast food. Every item on our menu is made with only the freshest, healthiest ingredients. Our specialty health products such as acai, wheatgrass and matcha green tea, pack a nutritional power punch that you just don't find at most restaurants. When you choose FRESH, you're doing your body - and your taste buds - a great favor. For complete nutritional information on our fresh and healthy menu items, visit: www.freshrestaurants.com. Healthier Food. Healthier Choices.

FRESH - Healthy Café - The Pavilion at Port Orange
